Common Course Numbering (&)

As of summer 2008, all Washington community colleges, including the Seattle Community Colleges, are using a Common Course Numbering (CCN) System. The system identifies courses that are equivalent at community colleges across the state to make it easier for students to transfer between two-year colleges.

Courses identified with an ampersand (&) are part of the CCN system (examples: ACCT& or HIST&). However, courses without an “&” will continue to transfer between two-year and four-year colleges under individual Direct Transfer Agreements (DTA), as in the past.

For further explanation of the CCN system visit www.seattlecolleges.edu/coursesSearch.aspx.

NOTE: Prefixes are revised to fit the statewide Common Course Numbering system implemented in Summer 2008. See pages 4 and 177 for further CCN information.

COORDINATED STUDIES

PROGRAMS/LEARNING COMMUNITIES

Learning Communities study a major theme from a variety of academic disciplines. A team of faculty and students use critical thinking to study important issues and concerns for the entire quarter. Students enroll for the entire program. Each program is taught by a team of diverse faculty members who conduct lectures and lead student seminars, field trips and group projects.

In Learning Communities, students and faculty work together on local and global issues requiring creative and active participation from all those in the classroom.

Though separate courses are listed on a student’s transcript, the program is conducted as one coordinated course and each program becomes a unique sum, greater than the total of the parts.

This innovative approach to teaching and learning has won national recognition for the Seattle Community College District. The sense of community and excitement generated by Learning Communities creates an atmosphere that is especially memorable and profound.
