Cloud Computing

MICROPATHWAY PROGRAM

Companies around the world are migrating to cloud computing. AWS Cloud Certifications are among the highest paying information technology credentials to have, particularly as you progress in your experience and learning. Employees with experience in this field are in high demand—especially in the Seattle area. The Cloud Computing micropathway can open the door to this lucrative field, with entry-level roles paying approximately $50K to start.

Our micropathway programs are designed to help you develop the skills and get the credentials you need to start an in-demand job quickly. They offer direct steps to employment while building toward a degree. These programs are "stackable." That means they count toward an associate and applied bachelor's degree in a related area if and when you want to take your learning further.

NORTH SEATTLE COLLEGE

What You'll Get

- **CompTIA A+ certification preparation**—the industry standard for establishing a career in IT and the preferred qualifying credential for technical support and IT operational roles—trusted by employers around the world

- **CompTIA Network+ certification preparation**—allowing you to develop a career in IT infrastructure covering troubleshooting, configuring, and managing networks, this powerful credential will help take your IT career to the next level

- **AWS Cloud Foundations certification preparation**—including cloud concepts, cloud economics and billing, AWS global infrastructure, cloud security, networking, databases, and more

- **Project Management Badge to supplement technical learning**

  Note: while the program will provide a solid foundational learning experience for certification, additional study may be required to take and pass the certification exams.
